

THE DEVITA-D ALLOWS YOU TO:

- Perform a comprehensive body screening;

- Detect the presence of various types of allergens, toxins, pathogenic microorganisms (viruses, bacteria, protozoa, fungi, helminths);

- Make a detailed assessment of the condition of specific organs and systems, to see the presence of inflammatory processes;

- Determine micronutrient and vitamin deficiencies in the body;

- Choose the right tools/methods to maintain health;

- Select homeopathic remedies, identify their compatibility when prescribing complex treatment;

- Create and maintain a customer data base;

- Operate in manual and automatic modes;

- Record custom electronic preparations;

- Create recommendations using Deholding products, which are available to the customer in electronic or printed form.

You will achieve the most effective measuring results by combining the two units of DeVita-D device and the EAVPro software.

DEVITA - D

CAPABILITIES OF HARDWARE- SOFTWARE COMPLEX

DeVita -D is a professional high-precision device for body measurements unlike any other in the world, which combines both the measurement unit and the preparation-electronic selector unit in one housing.

With the EAVPro software, the DeVita-D will be more flexible and user-friendly for health professionals and users. The measuring unit fully corresponds to the VRT method and the R. Voll method. The Preparation-electronic Selector unit contains over 18,000 homeopathic preparations and is also equipped with an active reprinter (recording information) to instantly record these homeopathic preparations on carriers in both direct and inverted form, according to the H. Schimmel method.

THE BENEFITS OF DEVITA-D MEASURING:

HIGH PRECISION

SAFETY

VERSATILITY

EFFECTIVENESS

INFORMATIVE

UNIVERSAL

one device for wellness of the whole body

EFFECTIVE

the technologies are recognized by leading scientific organizations

EASY

intuitive interface and application schedule

SAFE

has minimal contraindications

PORTABLE

convenient device always at hand

RELEVANT

maintaining health, beauty and youth

DeVita-technologies are the fastest, easiest, most reliable and modern way of improving your health

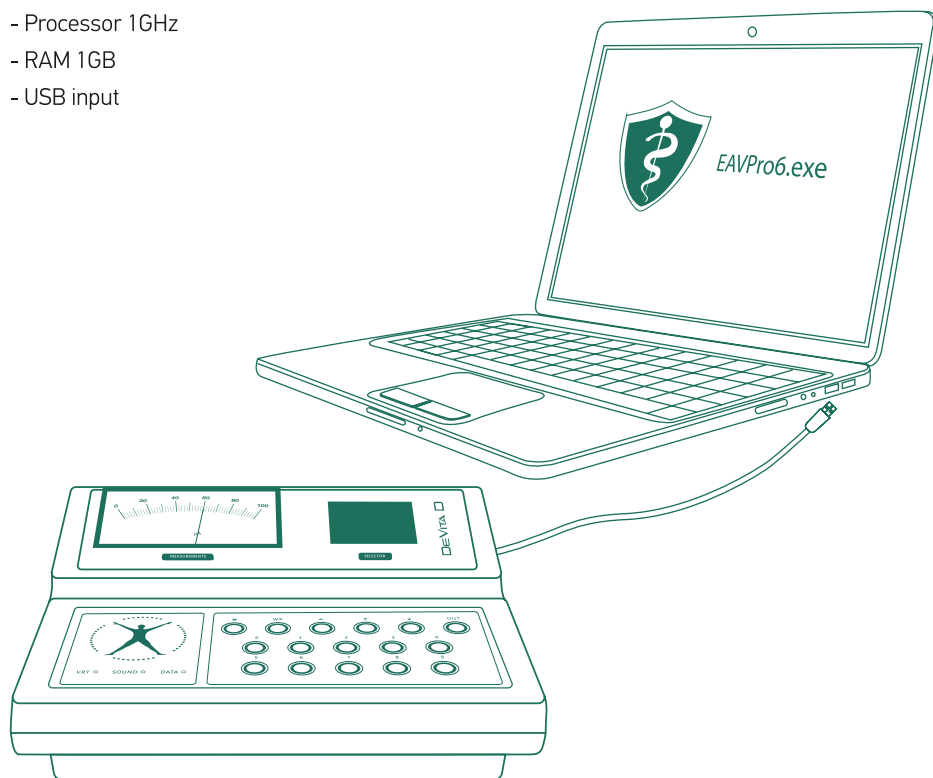

Introduction

The EAVPro program is intended to enhance user flexibility. The Application supports the following operating modes:

- Client archive;
- Appointment schedules;
- High speed and fully automatic function with an accuracy of at least 95%;
- VRT assessment results;
- Preparations & recommendations history;
- Detailed report of assessment results.

Minimum system requirements

- Processor 1GHz
- RAM 1GB
- USB input

PC CONNECTIVITY
VIA USB PORTS

1. "SELECTOR" Control panel
2. "MEASUREMENTS" Control panel
3. Measuring instrument – display of the current measurement value
4. Display – showing the preparations parameters
5. "USB" socket – connection to a computer
6. "P1-P7 INPUT SELECTOR" sockets – writing the user's preparations to a selector
7. "+5V" DC-IN socket – plugging the external power supply unit
8. Power on/off switch
9. "INPUT" socket – recording information input
10. "OUTPUT+" socket – non-inverted recording information output
11. "OUTPUT-" socket – inverted recording information output
12. "SEL" socket – selector output, preparation dispensing
13. "PASS" sockets – passive device output
14. "PROBE" socket – measuring probe input
15. "SOUND" button – sound on/off
16. "LANGUAGE" button – language selection
